Name: Leandro Baroca Communication Assessment Unit 1

Use this document to personally assess and rate each communication type you are assessed using.

You should rate each type of communication from 0 - 5, with 0 being not at all relevant and 5 being highly relevant. i.e. Tone of voice has zero relevance for an email.

You will need to make short comments for **all** communication types.

---

Method being assessed: Forums

Date of assessment:_____

Name: Leandro Baroca Communication Assessment Unit 1

| General communication | Relevance rating: 0 - 5 | Comments: |
|---|---|---|
| Cultural and Languages | 5 | This is very important because you need a strong form of communication for people to understand you. |
| Tone of voice | 1 | Tone of voice cannot be used online but you can express tone of voice by the way you type i.e. caps. |
| Terminology | 3 | Using the correct words can be important in a discussion but it doesn't need to be very formal. |
| Specific Format | 3 | The specific format of this is that this is a forum. |
| Importance of accuracy | 4 | Giving accurate facts is important in a discussion because you need good evidence to support your views. |
| Keeping audience engaged | 5 | This is also important because you need a person's/audience's attention to have a valid discussion. |
| Requires Technology | 5 | You need technology (computer, smartphone, etc.) to communicate online. |
| Questions and Answers | 4 | In a discussion, questions and answers are what mostly builds up a discussion. |

| Interpersonal skills | Relevance rating: 0 - 5 | Comments: |
|---|---|---|
| Verbal | 0 | Verbal communication cannot be used over a forum since it does not have VoIP systems. |
| Visual or hearing impaired | 3 | Visual impairment can affect their ability to communicate in instant messenger. Someone who cannot hear will not have a problem. |
| Body Language | 0 | Other people cannot see your body language through a forum. |
| Positivity or negativity | 3 | Positivity and negativity is a great factor in a discussion because it gives two sides to a discussion which can make a good conclusion. |
| Summarising and repeating | 2 | Repeating your post isn't needed because people can always read your previous post, but you can repeat some info to make a point in a reply. |

| | | |
|---|---|---|
| Environmental barriers | 1 | A power cut or extreme weather than can disrupt electronic devices can occur. |
| Social barriers | 3 | Being introvert has an effect on communication because you may be too nervous to respond. Other social barriers like friends or family can interrupt you, but forums can be sent anytime. |
| Questioning; Open, Closed etc. | 4 | Opened and closed questions are important in a discussion because open questions can have an in depth answer and a close question can be used to justify a final answer. |
| Responding; Speed, tone etc. | 4 | Responding is very important because you need to answer a question that has been asked or you could correct someone who’s incorrect. Speed of response isn’t very important on a forum because you can post anytime and the original commenter can read it at any time. |

Name: Leandro Baroca Communication Assessment Unit 1

| Written communication | Relevance rating: 0 - 5 | Comments: |
|---|---|---|
| Emoticons | 1 | Emoticons aren't very important because you don't need them in a discussion but they can be used to display emotions. |
| Accurate information | 5 | External links can reinforce evidence that you have on the discussion. |
| Spelling and Grammar | 4 | Having understandable spelling or grammar is important in a discussion because you need to be understood. |
| Specific Structure; i.e. Look | 3 | The structure is relatively important because it makes it easier and faster for others to read your post, but it is not a 'must-have'. |
| Relevance of contributions | 5 | Taking part in the discussion is very important because you are part of the discussion, therefore you need to contribute to make the discussion valid. If you don't contribute you aren't part of the discussion. |
| Need to proof-read | 2 | Proof reading can be important because mistakes can be made but even if you do make a mistake your post can be edited at any time. |

| | | |
|---|---|---|
| Balanced views shared | 4 | Balanced views are important because you can see both sides of the spectrum on the discussion. |
| Note taking | 2 | Note taking is not a really important part of a discussion but having notes of the points in a discussion is good to have a simpler view. |

Autonomous cars may be 'safer' than drivers because of the nature of human mistakes, but I think that banning the ability to drive will be horrible for people that have a passion for cars and it makes the car and driver more vulnerable.

For example, the electric car manufacturer, Tesla, already have an advanced autonomous driving system that only works on motorways. But, if the software gets confused, the car would do a warning beep to warn the driver to grab hold of the steering. If the driver does not have his hand on the steering wheel, the car would slow down.

http://www.autoblog.com/2016/09/26/autopilot-tesla-version-8-warning-video/

If a car was fully autonomous, like googles autonomous car, it can have a fault in its software or it could have a security breach, putting the driver is serious danger. Like this event that happened to someone who was in Google's autonomous car: https://www.engadget.com/2016/09/24/googles-self-driving-car-is-the-victim-in-a-serious-crash/

In my opinion, I wouldn't want a full ban on driving a car because it would remove the fun in driving, and I think having full control of a car is what makes it such a unique experience.

Would we have to pay for it though? It technically isn't our fault, its the autonomous driving's fault.

Dylan, I agree that autonomous driving would reduce the death rate of human error, but what about the error on the autonomous car. Like damaging of the sensors or an error in the software?

The company Tesla already took in consideration that technology always goes wrong, that's why they recently updated their autonomous driving software.

http://www.teslarati.com/tesla-autopilot-version-8-0-nags-restrictions/

Their software now does a warning beep on their cars when the software gets confused, and if the driver does not place his hands on the steering wheel the car would give the driver the '3 strikes and you're out' rule, after 3 warning strikes the car would slow down and go into park mode.
