Name: Leandro Baroca Communication Assessment Unit 1

Use this document to personally assess and rate each communication type you are assessed using.

You should rate each type of communication from 0 - 5, with 0 being not at all relevant and 5 being highly relevant. i.e. Tone of voice has zero relevance for an email.

You will need to make short comments for **all** communication types.

---

Method being assessed: Slack Web Messenger

Date of assessment:_____

Name: Leandro Baroca Communication Assessment Unit 1

| General communication | Relevance rating: 0 - 5 | Comments: |
|---|---|---|
| Cultural and Languages | 5 | This is very important because you need a strong form of communication for people to understand you. |
| Tone of voice | 1 | Tone of voice cannot be expressed because of lack of a VoIP system, but capitals, exclamation marks or emoticons can be used to express the tone of voice. |
| Terminology | 3 | Using the correct words can be important. |
| Specific Format | 3 | Instant messenger is live communication. |
| Importance of accuracy | 4 | Giving accurate facts is important in a discussion because you need good evidence to support your views. |
| Keeping audience engaged | 5 | This is also important because you need a person's/audience's attention to have a valid discussion. |
| Requires Technology | 5 | You need technology (computer, smartphone, etc.) to communicate online. |

| | | |
|---|---|---|
| Questions and Answers | 4 | In a discussion, questions and answers are what mostly builds up a discussion. |

| **Interpersonal skills** | **Relevance rating: 0 - 5** | **Comments:** |
|---|---|---|
| Verbal | 0 | Verbal communication cannot be done on slack because it does not have a VoIP system and it is not a face to face communication. |
| Visual or hearing impaired | 3 | Visual impairment can affect their ability to communicate in instant messenger. Someone who cannot hear will not have a problem. |
| Body Language | 0 | Other people cannot see what you are doing while online. |
| Positivity or negativity | 4 | Having positive and negative views is important so you can balance the discussion making points on whether the positives outweigh the negatives or the negatives outweigh the positives. |

| | | |
|---|---|---|
| Summarising and repeating | 2 | Summarising a subject is very important so you can conclude what your point was. Repeating isn't very important because what you have written down can be backtracked. |
| Environmental barriers | 2 | Environmental barriers can be a barrier to communication on slack. I.e. Fires, extreme weather, power outage, internet outage, etc. |
| Social barriers | 3 | Social barriers can affect your communication because if you are shy you will have a hard time taking part in the discussion. |
| Questioning; Open, Closed etc. | 4 | Opened and closed questions are important because having opened questions is a very detailed way of having a conversation while closed questions is a good way to summarise a point. |
| Responding; Speed, tone etc. | 4 | Responding to a question or comment is very important to either reinforce your point or correct the comment. The speed of response isn't very important because people |

| | | |
|---|---|---|
| | | type at different speeds and you can respond at any time you like. Tone cannot be expressed on typing but you can use capitals or emoticons to express feelings. |

| **Written communication** | **Relevance rating: 0 - 5** | **Comments:** |
|---|---|---|
| Emoticons | 1 | Emoticons aren't very relevant but they can be used to display your emotion. |
| Accurate information | 5 | External links can reinforce evidence that you have on the discussion. |
| Spelling and Grammar | 4 | Having understandable spelling or grammar is important in a discussion because you need to be understood. |
| Specific Structure; i.e. Look | 3 | The structure of slack makes it a very easy platform to access, this is important because you can access your channel for discussion fast, easy and efficiently. |
| Relevance of contributions | 5 | Contributing to the discussion is important otherwise you are not part of the discussion you were invited to. |

| | | |
|---|---|---|
| Need to proof-read | 3 | Proof reading can be important for checking spelling or grammatical mistakes so people can understand you comment better. |
| Balanced views shared | 4 | Having balanced views is important because you cannot have everyone agreeing or disagreeing otherwise it's not a proper discussion of the subject. |
| Note taking | 2 | Note taking is not a really important part of a discussion but having notes of the points in a discussion is good to have a simpler view. |

Predicting what AI will become is a difficult question because we have to predict the future. Yes, there are the harmless AI like siri, Cortana, etc. But, we have to consider the pace the AI are evolving, evolving so quick that it even captured the interest from the armed forces. For example, the ALPHA project carried out by the US Air Force: http://www.forbes.com/sites/jvchamary/2016/06/28/ai-drone/#ce9b8f562978

> Forbes
> **Drones Can Defeat Humans Using Artificial Intelligence**
> An artificial intelligence system has beaten tactical experts in air combat simulations.
> (123KB)

:-) **Leandro Baroca** 9:31 AM
@kathrynh It's also not any ordinary plane, this AI drone was specifically made for combat missions, as quoted on the article "Researchers have developed an artificial intelligence that can defeat human pilots in combat." (edited)

:-) **Leandro Baroca** 9:38 AM
@kathrynh If by airplane, you mean a commercial airliner, then it can be worrying. I cannot pinpoint for sure how dangerous it can be because it basically doesn't exist, but I believe it would have risks suck as being hacked into or it had some kind of error.

:-) **Leandro Baroca** 9:43 AM
@kathrynh Well, technically there isn't a way to "stop" a hacker. You can slow him down, but there is always a way to bypass security.

:-) **Leandro Baroca** 9:44 AM
@kathrynh I'm not an AI specialist, but I do believe AI can multitask.
