Unit 1 - Communication and Employability in IT
Assignment 5 - Task 2 [Part 2]

Original

College Poicy
Policy Number:
50
Subject:
Acceptable Use Poliy (staff)
Purpose
The purpose of this E-Safety Policy is to provide a hih level of e-safety while at the same time facilitating a rich e-learning environment at Highlands College
Policy
The College will use the DfESC's Acceptable Use Policy (AUP) as the basis of staff IT useage within the Colege.
Scope:
All staff
Produced by:
Deputy Principal
Key Principles Under-pinning the policy is the belief that users are most likely to remain e-safe when they are appropriately educated about the threats that ICT and the Internet can pose media.
This Policy recognises that the range of devices that can now be used for e-learning is much broader than the traditional hard-wired desktop PC alone and as such should be embraced Highlands is fortunate to beefit from a wealth of talented and enthusiastic educatos who have engaged with the e-learning agenda and pioneered a range of innovative projects and should be encouraged to do so within an appropriately e-safe environment
The Highlands community is diverse and any e-safety policy needs to be fit for purpose for the learning needs of those community members.
Operational Arrangements Staff may bring personal ICT equipment on site, however this must not be physically conected to the College network without the permission of the Head of Information and Technical Services. Any resource or image on such equipment should not displayed until after they have been assessed by the member staff and have found them to be entirely suitable As part of the permanently contracted staff induction process, the Head of Human Resources will arrange for the signature of the AUP, a copy of which will be kept on file. Visiting lecturers who require access to the College network will be asked to sign a copy of the AUP. Where guest speakers are used it is the responsibility of the arranging tutor/member of staff to ensure that the material to be used is suitable. Due to the flexible working patterns of staff, access will be allowed for limited personal use during college opening hours, subject to this being consistent with the other articles of the DFESC AUP Access to websites blocked by the College's filtering service can be obtained by submitting an email request to Information and Technical Services. Unblocked websites, services and other resources should not be displayed until after they have been assessed by the staff member and they have found them to be entirely suitable.
50 Acceptable use policy (2) Page 2 of 3
If staff accidentally come across or receive unsuitable material this should be reported immediately to the Head of Information and Technical Services. It is recognised that the use of social networking sites may be appropriate particularly if they are part of a prescribed programme of learning and such access is necessary for the successful completion of the teaching and learning programme. An annual programme of training, for example the EPICT E-safety module, will be provided by Professional Learning so that staff are fully aware of the implications of the policy.
