CAVE2

Leandro Baroca and Dylan Fernandes

What is CAVE2

Cave2 is a next generation Hybrid Visualization Environment. CAVE 2 combines the benefits of scalable-resolution display walls with a ground-breaking, second-generation virtual reality system.

Below are the specifications of CAVE 2:

- 320 degree, panoramic design
- 20.1 surround sound audio system
- Scalable high-performance computer cluster
- Ultra high quality resolution of 0.29 inch per pixel
- 60’ x 8’ display, for 480 square feet of viewing surface

What CAVE2 can be used for

In today's information rich world there are limitless uses for virtual environment, such as:

- Info-rich data analysis
- Virtual environment simulation
- Oil and gas discovery
- Design engineering
- Training
- Architectural design
- Large-scale collaboration

How CAVE2 can be used on Business Systems

Cave2 can be used in many businesses that is based on science research, construction and medical research. For example:

- CAVE2 can help improve architecture because they can look at their plans in depth.
- It can help with science research because you can view microscopic environments on a large scale
- It could help with medical research by viewing the body on a large scale to check how diseases affect the body.
- IT could be used for Estate Agents for touring inside a house instead of visiting the physical property.

These were a few examples of are many, limitless uses that CAVE2 helps with Business Systems.
